Method of execution

After patterns from book drawings to the end of this magazine, you will find the same for the ages and in our drawings and some variations when the basic stitches and in the book. We would like to point out that the following type figures according to each drawing correspond to the number of the row and that the later can give the number of chain stitches to make in a loop.

Chain stitch

CH 100

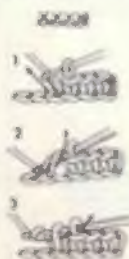

Half double crochet

2 chain stitches make one half double crochet.

Single crochet

Insert hook from the front to the back over the second chain from the hook. Wrap the yarn around the hook and draw it through the stitch, wrap the yarn over the hook again and draw the yarn over, loop through both loops on the hook.

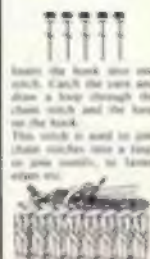

Double crochet

3 chain stitches make one double crochet.

Slip stitch

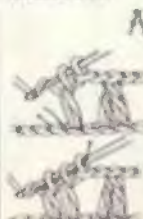

Triple crochet

4 chain stitches make one triple crochet.

2 de clusters

Double triple crochet

5 chain stitches make one double triple crochet.

3 de clusters

Puff stitch

Part of 1 row.

Part of 1 row.

Popcorn stitch

Picot

Each chain stitch alone makes a small picot. To form picots, draw together all three carrying threads with a slip stitch or a single crochet for ring picot.

To begin

Make a chain and join with slip stitch.

To begin

Make a loop with end of yarn.

To begin

Make double loop with end of yarn.

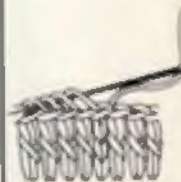

Front raised dc

Work through front of each of previous row and half double stitches. Proceed in the same manner for half double stitches of single stitches.

How to assemble a crochet work with material

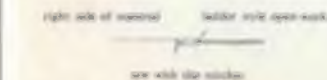

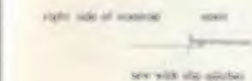

1 - Setting material on work

Make piece of work according to size of material. Fold the edge of the material and place piece of work under material with overlapping of material of 1-4 inches. Then cut sew with sewing machine. Use slip stitches in one edge of work in material.

2 - Joining piece of work on material

As in 1, make work according to size of material. Fold edge of material over and use with slip stitches. Place work over this line. Turn over and use edge of material as work.

To change colors

1 - To work in colors of different colors. Before pulling the last loop of the 1st row, change to a pair of different color and proceed as in 1. Make a chain to start a new row changing the direction (2). Tap the ends of both parts together and blend them into wrong side of slip work. On lower chain, make sure the new row is started. Then you pull them up and join them together with the new stitch.

2 - To attach a new thread. From the back, pull yarn and work out chain. Pass the thread as indicated by the arrow. Then work the new chain.

Joining after motifs are completed

1 - Joining with wrong stitches. Unravel all the motifs and connecting them together with a needle to connect stitches. This method can be used only straight-line motifs in the shape of triangles or squares. Place motifs on top of each other, right side of work up and join them in correct stitches.

2 - Joining with slip stitches. This is also for motifs with a row of slugs. Place motifs with wrong side up and work in taking external part of stitches.

To join motifs while working
